ARITOHAM
PROTOCOL

Zero Supply. Smart Contract *Finance.*

Aritoham Protocol is a transparent Web3 finance ecosystem where token creation, supply reduction, price support and utility growth are governed by smart contract logic.

Zero initial supply, **smart minting**, **liquidity reinforcement**, controlled **burning** and **renounced ownership** create a trust-focused Web3 model.

1

Zero Supply Token

Tokens are not pre-created. Supply starts from zero and grows only through on-chain participation.

2

Smart Minting

80% of every staking transaction is minted through smart contract logic.

3

Price Support

100% is routed into liquidity to strengthen price support and market stability.

4

Ownership Renounced

No admin keys, NO pause, NO upgrade and NO hidden contract control.

Solidity 0.8.20 | aritoham.com | team@aritoham.com

ARITOHAM
PROTOCOL

Centralized Web v/s Web3 Ecosystem

Centralized Web

- Controlled by a single authority
- Private data storage
- Platform-side ownership
- Limited transparency

VS

Web3 Ecosystem

- Decentralized governance
- Blockchain transparency
- User-side asset ownership
- Trustless system

Decentralized Control

Contract Automation

Ownership Renounced

Tokenized Economy

Solidity 0.8.20 | aritoham.com | team@aritoham.com

ARITOHAM
PROTOCOL

User Flow — *From Wallet to Yield*

1 Connect Wallet

Use connects a Web3 wallet to the ARI dApp.

2 Choose Package

Select a staking amount between $10 and $1,000.

3 Smart Deposit

Deposit is routed into the staking smart contract.

4 Mint ARI Token

User mints ARI tokens and becomes eligible for rewards.

5 Daily Rewards

Up to 12.5% daily reward generated on deposit.

6 Claim / Withdraw

User can claim rewards or withdraw as per protocol rules.

7 Community Distribution

Referral and community income distributed by smart contract rules.

8 Track in Dashboard

Mining and earnings data visible on the live dashboard.

ARITOHAM
PROTOCOL

ARITOHAM Tokenomics — Architecture of Trust

1

Smart Contract Automation

All minting, burning and reward logic is automated on-chain.

2

Ownership Renounced

No admin can mint, pause or change the contract after deployment.

3

Zero Supply Token

Supply starts at zero and grows only through user-initiated minting.

4

Anti-Whale Protection

Capped deposits help prevent supply shocks and price manipulation.

ARITOHAM PROTOCOL

Built on Binance Smart Chain

Aritoham Token is deployed on BNB Smart Chain, offering fast transactions, low gas fees, BEP-20 compatibility, and broad wallet support.

BEP-20 Compatible

Fast Transactions

Low Fees

Supported Wallets

- MetaMask
- Trust Wallet
- SafePal
- TokenPocket
- Bitget Wallet

Solidity 0.8.20 | aritoham.com | team@aritoham.com

ARITOHAM PROTOCOL

Token Minting & Burning Mechanism

Every deposit drives minting and liquidity. Every sell drives burn and stability.

Mint Side

USER MINT

100% → MINTED AMOUNT
(Added to Liquidity)

80% → TOKEN MINTING
(New Aritoham Tokens Minted)

20% → PRICE GAP
(Create Price GAP Upward Support)

Sell Side

USER SELL

100% TOKENS BURN FROM CONTRACT
(Supply Reduce)

15% → LIQUIDITY ADDED
(For Last User Support)

PRICE IMPACT
(Upward Support)

ARITOHAM PROTOCOL

ARITOHAM v/s Market Tokens

Mint-Burn architecture vs **Pre-minted allocation-based** market tokens.

ARITOHAM Token

Zero-Supply • Mint & Burn Token

- Supply starts from zero
- Minting & Burning happen only through smart contract
- No pre-minted allocation or private reserve
- No admin hold token inventory, reducing manipulation risk

ARITOHAM: smart-contract mint & burn, zero-supply design, no pre-held allocation.

VS

Typical Market Token

Pre-Minted • Allocation-Based Token

Mint-Burn architecture vs pre-minted allocation-based market tokens. **Manipulation Possible**

Market Tokens: pre-minted allocations can enable hidden selling pressure and supply manipulation.

ARITOHAM
PROTOCOL

Minting Impact on Token Price

Every deposit drives minting and liquidity. Every sell drives burn and stability.

USER	MINT AMOUNT	MINT PRICE	MINT TOKEN (80%)	TOTAL SUPPLY (ARI)	CONTRACT LIQUIDITY	NEW PRICE
USER 1	$100	$1.00	$80 / 80 ARI	80	$100	$1.25
USER 2	$100	$1.25	$80 / 64 ARI	144	$200	$1.38
USER 3	$500	$1.38	$400 / 290 ARI	434	$700	$1.61
USER 4	$1,000	$1.61	$800 / 496 ARI	930	$1,700	$1.82

Total Supply
930 ARI

Total Liquidity
$1,700

Last Price
$1.82

Designed for
Universal Price Support
Every mint increases liquidity, reduces volatility and supports long-term token value growth.

PROTOCOL

SIX WAY TO EARN PASSIVE INCOME

Stacked income streams — capital, network, leadership, ecosystem and one-time leadership rewards.

01

MINTING REWARD

1.25%

Daily Rewards on full deposit capital. Capped at 2X.

02

DIRECT INCOME

5%

One-time income distributed.

03

GENERATION INCOME

30%

Community Reward across team daily income, 20 levels deep.

04

RANK INCENTIVE

35%

Leadership Reward through the Rank System — unlimited depth.

05

RANK REWARD

$125K

One-time achievement reward up to Emperor Rank.

06

DAO PARTNER PROGRAM

5%

Partner pool for qualified protocol leaders.

Community Daily REWARD

LEVELS

20 Levels

MINIMUM DIRECT

$50+ Stake

LEVEL OPEN CRITERIA

Direct	Level Open
1	→ 2 Level
2	→ 4 Lavel
3	→ 8 Level
10	→ All Levels Open

Solidity 0.8.20 | aritoham.com | team@aritoham.com

RANK INCENTIVE

35%

Leadership rewards generated through the rank system, driven by rank qualification and smart-contract rules.

QUALIFICATION CRITERIA

1. Minimum 2 legs are required
2. Stronger leg will be counted as the Power leg
3. Target will be calculated from weaker legs
4. Rewards will be accumulated automatically
5. No time limit for rank qualification
6. Excess business will be carried forward

Rank	Self Contribution	Direct Team	Matching Business	Incentive %	Reward Allocation
Spark	$100	3 Directs	$5,000	8%	--
Rise	$200	5 Directs	$10,000	10%	--
Prime	$300	7 Directs	$25,000	12%	$500
Elite	$400	9 Directs	$50,000	15%	$750
Legend	$500	11 Directs	$100,000	18%	$1,750
Titan	$600	12 Directs	$250,000	20%	$5,750
Crown	$700	13 Directs	$500,000	25%	$11,250
Royal	$800	14 Directs	$1,000,000	30%	$25,000
Emperor	$1,000	15 Directs	$2,500,000	35%	$80,000

TOTAL RANK REWARD: $125K

DAO PARTNER PROGRAM

5%

5% OF EVERY SMART CONTRACT DEPOSIT WILL BE ALLOCATED TO THE DAO PARTNER POOL. THIS POOL IS DISTRIBUTED AMONG ELIGIBLE DAO PARTNERS BASED ON QUALIFIED SHARES.

DAO Partner	A	B	C	D	Others	Total
Matching Business	$2,500	$7,500	$5,000	$10,000	$20,000	$45,000
Number of Shares	1	3	2	4	0	**10**
Value of 1 Share = Value of 1 Share – Total Pool ÷ Total Shares						
DAO Partner Reward	$225	$675	$450	$900	-	**$2,250**

This is a perfect combination of **Reward for Performers & Builders** by becoming long-term shareholder of the platform.

DAO TURNOVER INCOME

Global DAO Turnover – 5% Pool Share

Every $2,500 = 1 Share

Entry Condition

Within 20 days of account activation:

$5,000 Direct Business OR **$10,000** Matching Business

More Shares = More Reward

Weekly Claim

Important Note:
To stay active in the 5% Global Turnover Pool, each partner must generate $2,500 weekly matching business. Closing is every Monday. If missed, that week's reward will be skipped. Eligibility resumes once the target is completed next week.

PROTOCOL TERMS & CONDITIONS

1 – DEPOSIT & PLATFORM TERMS

- Minimum Deposit: $10
- Maximum Deposit: $1,000
- Ecosystem Development Fund: 10%
- Daily Reward: Up to 1.25%

2 – WITHDRAWAL, REWARD & PAYOUT TERMS

- Minimum Withdrawal: $10
- Withdrawal Fee: 5%
- Daily Withdrawal Limit: $3,000
- Reward Income Limit: 2X of mint amount
- Working Income Limit: 3X of mint amount

IMPORTANT NOTE

- Reward Income is included inside the 3X working income limit.
- Rank Reward and DAO Partner Income are credited separately.
- Rank Reward and DAO Partner Income are not counted inside the 3X working income limit.
- DAO Partner Program Fund claim will be available every Monday.

Know Your Portfolio

An AI-powered portfolio intelligence wallet that helps you understand, manage, and protect your assets with clarity.

Portfolio Overview
See your holdings in one place.

Asset Allocation
Understand how your assets are distributed.

Performance Tracking
Track growth, value, and portfolio movement.

Smart Summary
Get clear AI insights for better decisions.

Security Alerts
Receive real-time alerts for unusual wallet activity.

Suspicious Activity Detection
Get notified about abnormal or risky behavior is detected.

Approval Monitor
Identify risky token approvals and review permissions.

Dormant / Dead Wallet Alerts
Detect inactive or suspicious wallets connected to your wallet—based on predefined rules.

MINT · BURN · GROW

ARITOHAM PROTOCOL HIGHLIGHTS

ARITOHAM

Core mechanisms of the BNB Chain ecosystem, mint & burn model, staking and community reward architecture.

BNB CHAIN
Protocol foundation

MINT RANGE
$10–$1,000 per mint

MINT ALLOCATION
80% Staker · **20%** Liquidity

BURN MECHANISM
100% of tokens sold are stated to be burned

STAKING
Participation in the published model

DIRECT REFERRAL
5%

GENERATION REWARDS
30% · up to 20 levels

RANK INCENTIVE
35% · one-time rank rewards up to $125K

DAO PARTNER
5% · weekly distribution model

PUBLSHED PROJECT MODEL · NOT ON-CHAIN VERIFIED · REWARDS ARE NOT GUARANTEED

Percentages are separate reward categories, not a token-supply allocation. Verify contract execution and eligibility rules.
